

# Your Choice Is Clear.

VisionGraft® has become the go-to choice for glaucoma tube shunt coverage.

VisionGraft is sterile, ready to use, and remains as clear as non-irradiated corneas.<sup>1</sup>

## VisionGraft® *The Clear Choice*®

Successfully used in over 40,000 surgeries.

VisionGraft patch grafts are precisely processed to cover tubes for your glaucoma drainage device procedures. This ready to use graft also provides tectonic support for revisions of trabeculectomy flaps and exposed tube shunts. VisionGraft is a reliable patch graft with premium benefits.

### Clear

- Provides cosmetic advantages for your patients
- You can perform laser suture lysis through the graft

### Ready To Use

- No splitting or cutting required
- No rinsing or rehydration needed

### Readily Available

- 2-Year shelf life
- Store at room temperature

### Safe, Durable & Dependable

- Sterile—non-immunogenic<sup>2</sup>
- Histology shows structure is intact post-irradiation<sup>3</sup>
- Suture strength comparable to fresh corneas<sup>3</sup>

Exclusively processed  
and distributed by:

# VisionGraft® *The Clear Choice®*

## Innovative Tissue Processing

We strive to honor the gift of donation through research and innovation. As a direct result of this commitment, VisionGraft® became the **first sterile corneal allograft** available to ophthalmologists. KeraLink International's exclusive process preserves corneal tissue so it is ready to use whenever you need it.

- Proprietary process inactivates the antigenicity of cells
- Terminally sterilized with precision gamma irradiation to a sterility assurance level of  $10^{-6}$
- Stored in a non-toxic, biocompatible albumin based medium

CATALOG NO.	DESCRIPTION	DIMENSIONS
C0301AL-90	Split Thickness Half Moon	4.5mm x 9.0mm
C0302AL-90	Split Thickness Third Moon	4.5mm x 6.75mm (7.8mm diag.)

## Advancing Corneal Transplantation

For more than five decades, KeraLink International (formerly Tissue Banks International) has been a leader in corneal transplantation. Our singular mission is to reverse corneal blindness globally through transplantation, innovation, and partnerships. Much of our work is technical, but underlying all of our efforts is a deep respect for the remarkable, selfless gift of tissue donation and a steadfast commitment to honor this gift.
